Who is eligible to participate?

Primary care providers at all levels (including physicians, physicians assistants, nurses, psychologists, pharmacists, social workers, CASACs, mental health specialists, physical therapists, chiropractors) and suboxone providers with interest in prevention of addiction, medication assisted treatment and pain management clinicians are welcome to join. This program is especially helpful for new MAT prescribers.

What is required to participate?

- Broadband internet connection
- Webcam support device
- 75 minutes biweekly to attend
- Willingness to present 2 cases
- Completion of periodic surveys evaluating knowledge, competence, and self-efficacy/outcomes.

Why participate?

Your schedule is valuable. What does this ECHO project bring you? Participation will bring you specialty knowledge and:

- Free CME
- Non-judgmental guidance around the prescription of opioids
- Evidenced-based recommendations
- Coaching around how to handle the psychosocial needs of complex patients who have pain, substance use disorder, and mental health conditions
- An introduction to the utilization of medication-assisted treatments in primary care
- Treatment resource information

How the TeleECHO on Chronic Pain, Opioid Prescription Substance Use Disorder, and Medication Assisted treatment works?

The TeleECHO clinic is a case-based education experience in which specialist providers and with community clinicians develop a “knowledge network.” Each session will last 75 minutes and will include a brief didactic presentation, followed by case-based educational discussions with content experts. The clinics will be held biweekly during the noon hour. CME credits will be provided for each hour of participation at no cost to the participant.

Free AMA PRA category 1 credit CME, hour for hour for participation. Clinics will be Mondays noon-1:15 p.m. beginning October 22, 2018.
